

# INXShield™

High-Performance  
Functional Coatings

INXShield™ functional coatings are engineered to provide an extra layer of protection and performance for packaging applications. Built to meet both decorative and functional demands, these coatings help maintain product quality, enhance durability, and simplify cleaning. With options for aqueous, energy curable, and specialty formats, INXShield delivers reliable performance across a wide range of substrates and applications. Printers and brand owners can trust INXShield to boost efficiency, extend product life, and deliver consistent results.

## Product Features

High-performance coatings designed for packaging applications, available in aqueous, energy curable, and specialty options.

- Maintains freshness and appearance
- Enhances durability and resistance
- Simplifies cleaning and care
- Provides long-lasting protection
- Ensures consistent quality performance
- Broad compatibility across substrates
- Available in overprint varnishes and specialty finishes

## Customer Benefits

These functional coatings deliver reliable advantages that enhance product quality and improve production efficiency.

- Reduce maintenance and rejects
- Enhance appearance and durability
- Reliable performance across applications
- Add extra protection to packaging
- Flexible options for multiple substrates
- Backed by INX global expertise
